Stronger than the leading competition!

Shelter SF2500 tent flooring is stronger than the leading competition at 150 psf! Offering a fully integrated system, Shelter SF2500 is available in 2.5m and 3m grids, with a patent pending flooring deck and a large main beam of 45000 psi.

Completely Integrating

Our flooring system can be used universally with clearspan products throughout the industry including your existing Shelter Structures America products. Integrated railing options make for a cohesive appearance, while increasing strength and security.
